

# Reference 100 MkII

The Reference 100MkII is an awesome adjunct to compliment the most discerning cinema and music system! The 120 watts MOSFET amplifier feeds an ultra long-throw super-rigid sub-bass driver of exquisite design and finish. Add to this the battleship construction, beautiful finish, and attention to the finest and smallest detail, which ensures the Reference 100MkII delivers adroit punch and solid slam – without the dreaded overhang – down to a gut-wrenching 13Hz.

Our unique combination of state-of-the-art electronics and tuned hand-built sealed cabinet, affords the user the ultimate in sub-bass control. Deep and powerful enough for the most demanding movie sound-track, yet subtle, agile, fast, and accurate for the highest fidelity in music listening. It's just like being there!

When sub-woofers look and sound this good, there is truly no alternative.

## Specification:

- 120watt MOSFET Amplifier
- Speaker and Line Level inputs with Gain Control Range 99dB
- Neutrik Speakon connector (High level 100k ohm)
- Unbalanced RCA (phono) connector (Gold Plated) (Low level 10k ohm)
- Sophisticated Crossover Circuits - variable increments between 20Hz and 120Hz
- LFE Bypass setting
- 12 volt trigger
- Remote Control with 'out-of-sight' RM Eye and 4 user-presets
- Phase Control infinitely adjustable between 0° and 180°
- Frequency response 13hz to 200hz \* D.I.P. (Dynamic Intelligent Protection)
- D.A.M.P. (Digitally Accurate MicroProcessor 2nd generation)
- Specially designed cabinet structure, volume, and configuration made from inert 18 & 25mm MDF
- Digital Display with power output meter and frequency setting
- Switched fused IEC mains input socket
- 250mm (10") Ultra Long-throw Driver with Heavy Duty steel chassis & Double Magnets
- UK 3 year manufacturers return to base warranty
- Dimensions (WxHxD) 280mm X 280mm X 320mm \* Weight 14.23kg (31.37 lbs)
- Specifications subject to change without notice. E & O E
